LECANDA

portfolio 2008

An eager mind towards design, easily distracted by objects and captured by details.

Graduated as an Industrial Designer in Mexico City and worked as a freelancer.

Design involves an interdisciplinary vision, in order to create new and efficient solutions...
But never forgets the importance of a creative focus.

toc·toc

Playful aesthetics and modularity.

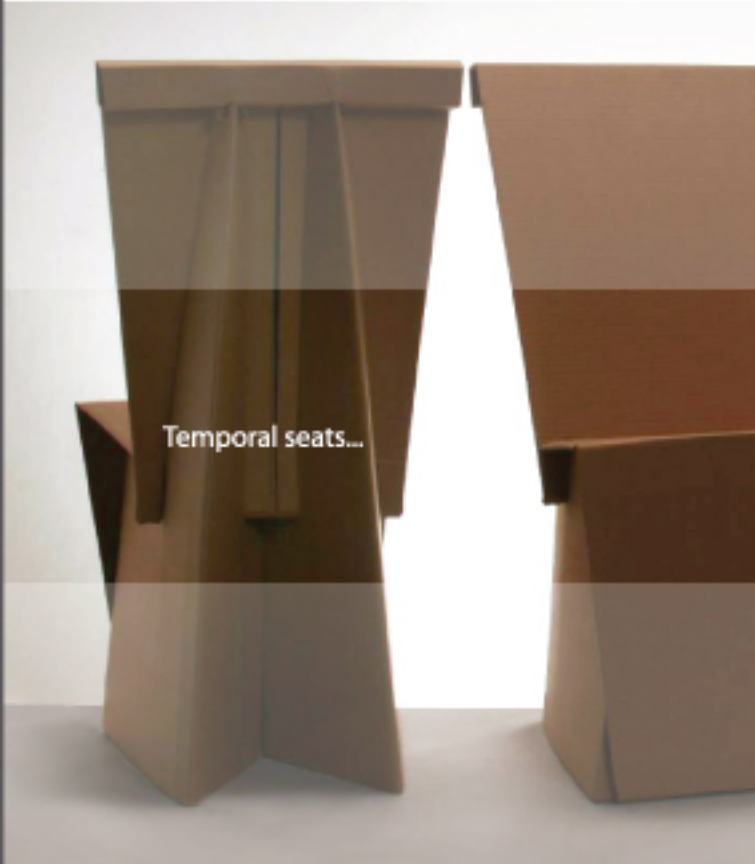

svin·ga

Decorative simplicity.

100% car-tón

Temporal seats...

The image shows two chairs constructed from brown cardboard. The chair on the left is a high-back, tapered design with a wide seat and a narrow base. The chair on the right is a more traditional, boxy chair with a flat seat and a slightly flared base. Both chairs are made of a single piece of cardboard, demonstrating a minimalist and sustainable design approach.

.. for temporal needs.

ga·ma·bar

Everything has its place

idex

New style and product features.

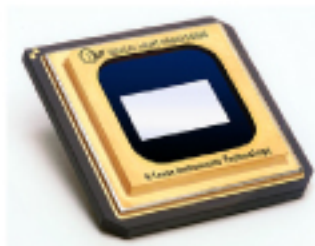

IDEX is the redesign of a mechanical surgical table. Its design is based in ergonomic and functional requirements for both surgeons and patients.

aeris

The redesign of Martin Pro's MAC2000 replaces mechanical gobos and shutters with DLP technology, improving product features and reliability.

chill-out

It's a VOLVO!

Things we do while we wait...
